“We cannot change the outcome, but we can affect the journey.”
– Ann Richardson, author

Greater Rochester and Wabasha, Minnesota
Hospice Services

Mayo Clinic Hospice services are available to persons of all ages with both a diagnosed terminal illness and a prognosis of six months or less to live.

We serve residents of Dodge, Fillmore, Olmsted, Wabasha and parts of Winona and Goodhue counties in Minnesota.

Hospice can be provided anywhere the patient lives: at home, the hospital, at an assisted living facility, a memory care facility, a nursing home, foster home, etc.

Philosophy

- Hospice offers care to patients facing life-limiting illness and recognizes dying as a normal process of living.
- Hospice care is individualized, comprehensive, medically directed and cost effective.
- Symptom management of physical, spiritual and emotional needs of patients and their caregivers is provided by an interdisciplinary team of professionals and volunteers.

Bereavement Support

Mayo Clinic Hospice offers caring support to families for 13 months following the death of a patient on hospice care. The support is provided through phone calls, mailings, home visits, counseling and if appropriate, referrals for more extensive counseling.

Grief support groups are offered for adults and a bereavement camp is offered for children and teens.

Volunteering Opportunities

- Patient Companionship
- Family Support
- Respite
- We Honor Veterans Program
- Bereavement Visits and/or Phone Calls
- Clerical and Office Support
- Pet Therapy
- Music Volunteers
