DEPARTMENT OF DERMATOLOGY AT MAYO CLINIC

DISCONTINUED DISCONTINUED DISCONTINUED

The Department of Dermatology at Mayo Clinic in Rochester, MN, is one of the largest and most comprehensive departments of dermatology in the world. With a history dating back to 1916, the department offers a broad spectrum of diagnostic and therapeutic services for patients with common and uncommon dermatologic disorders. In addition, the department hosts one of the largest training programs in the country for residency and subspecialty fellowships. Underlying our commitment to patient care is broad and deep involvement in clinical, translational, and basic scientific research advancing the understanding of dermatologic disorders.

COMPRISED OF THREE DIVISIONS

Division of Clinical Dermatology Patients with complex and routine medical dermatologic disorders are cared for by members of the Division of Clinical Dermatology, including patients with severe dermatoses requiring inpatient hospitalization or treatment in our outpatient skin treatment center. Pediatric Dermatologists provide specialized care for complex skin disorders in our young patients.

DISCONTINUED DISCONTINUED DISCONTINUED

Division of Dermatologic Surgery The Division of Dermatologic Surgery offers cutaneous oncologic care for patients with potential, recently diagnosed, and previously treated skin cancers, including those with severe involvement. Care is provided in a multidisciplinary format in conjunction with specialists from multiple surgical and medical subspecialties. In addition, the division provides expert treatment in the areas of general dermatologic surgery, venous disease, laser therapy, and aesthetic treatment.

Division of Dermatopathology and Cutaneous Immunopathology The physicians within the Division of Dermatopathology and Cutaneous Immunopathology provide primary and consultative diagnostic services for pathologic specimens of the skin, as well as serum-based testing for diagnosis of autoimmune blistering disorders.

Providers interested in referring a patient to our Specialty Clinics may contact our appointment coordinators at 507-284-2511 and ask for an appointment in the specialty clinic of interest.

SPECIALTY CLINICS

The Department of Dermatology at Mayo Clinic offers Specialty Clinics to deliver world-class, highly specialized care for patients with complex or challenging skin conditions. These clinics offer diagnostic evaluation and therapeutic management of patients with unique and problematic disorders of the skin. Information related to the condition is organized to enhance the physician's ability to establish a correct diagnosis and an optimal treatment plan. These treatment plans are developed to enhance and restore the patient's skin to its optimal function and appearance. Collaborative care with physicians from other specialties is coordinated as indicated by the patient's medical needs. Educational materials are provided for patients, and follow-up communication is facilitated through face-to-face and/or electronic mechanisms. Clear and helpful communication is provided to patient's local care provider.

All consultants in the Department of Dermatology are certified by the American Board of Dermatology and many have subspecialty qualifications in the areas of medical genetics, immunology, oral medicine, pathology, pediatrics, pharmacology, public health, internal medicine, and surgery. As academic dermatologists, all members of the faculty have specialized areas of expertise in which they conduct clinical research and advance the knowledge of the practice of dermatology. The Department of Dermatology offers consultation within the Specialty Clinics to serve the needs of patients with complex or severe skin disorders. These Specialty Clinics also serve as focal points for the advancement of clinical research in dermatologic care.
