Rethink your drink: 30-day challenge

Water is important for every cell in the body to function properly. Water helps the digestive system function better, promotes good kidney function, keeps your joints and muscles lubricated, supports healthier and younger-looking skin, and helps regulate body temperature.

Mayo Clinic recommends this minimum daily intake of water:

Women - 11.5 cups, or 92 ounces Men - 15.5 cups, or 124 ounces

This includes water in the foods you eat or other beverages you drink.

Ideas on how to drink more water:

- Set a goal; use the tracker.
- Bring a reusable water bottle with you everywhere you go.
- · Set a reminder on your device.
- · Infuse your water with fruit or herbs.
- Drink a glass of water as soon as you wake up and before each meal.

Keep track of your daily water intake. The goal is to drink at least eight glasses of water a day.

Day 1	0000000	Day 16 () () () ()
Day 2	0000000	Day 17 () () () () ()
Day 3	0000000	Day 18 0000000
